EDUCATION

GL Bajaj Institute of Technology and Management <i>B.Tech in Information Technology — CGPA: 7.71</i>	Greater Noida, UP 2022 – 2026
Jaypee Public School <i>Secondary (Class X) - 93% — Senior Secondary (Class XII) - 84%</i>	Greater Noida, UP 2019 – 2022

EXPERIENCE

Associate Software Engineer <i>MAQ Software, Noida</i>	Sept. 2025 – Present
- Developed and enhanced enterprise CRM solutions using Microsoft Dynamics 365 and the Microsoft Power Platform, contributing to end-to-end feature development and customization of business requirements. - Designed and implemented custom Dynamics 365 plug-ins, Power Automate cloud flows, and Power Apps model-driven app customizations to automate workflows and streamline CRM business processes. - Built and deployed AI-powered chatbot features using C# and .NET, managing the complete software development lifecycle from design and implementation to testing and deployment. - Leveraged Semantic Kernel to design kernel functions, orchestrate LLM-driven conversational workflows, and implement intent-based response pipelines, improving automation and user query resolution.	
Amazon ML Summer School 2025 <i>Amazon</i>	Aug. 2025
- Selected among 3,000 students out of 60,000+ applicants (top 5%) for Amazon's flagship ML program. - Gained hands-on knowledge in Supervised & Unsupervised Learning, Deep Neural Networks, Generative AI, Reinforcement Learning, Causal Inference, and Sequential Learning. - Learned from Amazon Scientists through sessions covering real-world machine learning systems.	

TECHNICAL SKILLS

Languages: C++, C#, Java, Python, SQL
Frameworks: .NET, Semantic Kernel, Django
Cloud & Platforms: Microsoft Azure Portal, Power BI, Power Apps, Power Automate, Dynamics 365
Developer Tools: Git, GitHub, PostgreSQL, VS Code, Visual Studio
Libraries: Pandas, NumPy, scikit-learn
Soft Skills: Team Collaboration, Effective Communication, Time Management

PROJECTS

AKTU PYQ Portal <i>HTML, CSS, Django, PostgreSQL</i> 🔗	Dec. 2024
- Developed a full-stack web portal using Django, PostgreSQL, HTML, and CSS to provide centralized access to AKTU previous-year question papers. - Integrated an AI-powered solution generation system to provide contextual answers and explanations for examination questions, enhancing learning and exam preparation. - Leveraged DocTR OCR for text extraction from question paper PDFs, enabling efficient content processing.	
Bank Customer Churn Model <i>Python, Kaggle, Machine Learning</i> 🔗	Oct. 2024
- Developed a machine learning model to predict customer churn using a banking customer dataset. - Utilized Python libraries such as pandas, NumPy, and scikit-learn to preprocess data and build models. - Achieved 93% accuracy in predicting customer churn.	

CODING PROFILES

LeetCode: 500 Problems Solved	Link: leetcode.com/u/udit55sharma
HackerRank: 5★ in SQL, 4★ in C++ & Java	Link: hackerrank.com/udit55sharma
